filtration

Introducing

nano ultra micro

Same membranes.
Same performance.
New names.

Dear Valued Customer,
At NX Filtration, we are committed to continuously improving the way we serve our customers, not only through innovation in membrane technology, but also by making our product portfolio easier to understand, specify and order.

We would like to inform you in advance that, **effective 1 September 2026**, we will introduce a simplified global product portfolio naming structure. Although **our product names will change, our technology will not**. The membranes you know and trust will continue to deliver the same proven performance, quality and reliability. This update is purely a simplification of our portfolio architecture, creating a clearer and more intuitive product family structure for customers worldwide.

What will change?

Over the coming weeks, we will introduce three new product families:

NX Nano **NX Ultra** **NX Micro**

A comprehensive Product Conversion Guide including all modules, accessories, spare parts and related components, will be shared prior to the official launch.

What will not change?

We want to reassure you that this transition **does not affect the products themselves.**

The following remain exactly the same:
- Proven membrane technology
- Product performance
- Product specifications
- Product dimensions
- Product quality
- Certifications and approvals
- Existing installations
- Manufacturing processes
- Technical support
- Your trusted NX Filtration contacts

Only the product names are changing.

Why are we making this change?

As NX Filtration continues to grow globally, our product portfolio has expanded considerably. The new naming structure creates a clearer, more intuitive portfolio that is easier for customers, consultants, OEM partners and engineering firms to understand and specify.

The result is a product portfolio that is:

Easier to understand **Easier to specify** **Easier to order** **Easier to expand**

while maintaining the same trusted membrane technology.

Introducing

nx nano nx ultra nx micro

Important timeline

Mid August 2026
Updated documentation and Frequently Asked Questions

1 September 2026
Official introduction of the new product names

September 2026
Transition period with updated documentation, website and marketing materials

Do you need to prepare?

For many customers, no immediate action is required. However, if your organisation references NX Filtration product names within:

- ERP systems
- Purchasing systems
- Engineering specifications
- Internal product databases
- Approved vendor lists
- Design documentation

We recommend reserving time during August and September to review and implement the updated product names once the Product Conversion Guide becomes available.

What will not change?

A complete overview of all updated product names and article numbers is included in the attachment.

- Product Conversion Guide
- Product name conversion tables

Starting 1 September, the following information will be available on our website:

- Updated datasheets
- Updated brochures
- Website updates
- Customer support information
- Frequently Asked Questions

Should you have any questions, your usual NX Filtration contact is ready to assist you.

Questions

Should you have any questions before then, please contact your usual NX Filtration representative. We appreciate your continued trust and look forward to introducing our simplified product portfolio.

Kind regards,

Team NX Filtration
